Rapid Communication

- 2311 **On the structure and synthesis of neuroprotectin D1, a novel anti-inflammatory compound of the docosahexaenoic acid family**
Igor A. Butovich

Research Articles

- 2315 **A lipid analogue that inhibits sphingomyelin hydrolysis and synthesis, increases ceramide, and leads to cell death**
Peter I. Darroch, Arie Dagan, Tami Granot, Xingxuan He, Shimon Gatt, and Edward H. Schuchman
- 2325 **Synthesis of phospholipid-conjugated bile salts and interaction of bile salt-coated liposomes with cultured hepatocytes**
G. Pütz, W. Schmider, R. Nitschke, G. Kurz, and H. E. Blum
- 2339 **Endothelial and lipoprotein lipases in human and mouse placenta**
Marie L. S. Lindegaard, Gunilla Olivecrona, Christina Christoffersen, Dagmar Kratky, Jens Hannibal, Bodil L. Petersen, Rudolf Zechner, Peter Damm, and Lars B. Nielsen
- 2347 **Adipocyte death defines macrophage localization and function in adipose tissue of obese mice and humans**
Saverio Cinti, Grant Mitchell, Giorgio Barbatelli, Incoronata Murano, Enzo Ceresi, Emanuela Faloia, Shupe Wang, Melanie Fortier, Andrew S. Greenberg, and Martin S. Obin
- 2356 **Lack of stimulation of cholesteryl ester transfer protein by cholesterol in the presence of a high-fat diet**
Sukhinder Kaur Cheema, Alka Agarwal-Mawal, Cathy M. Murray, and Stephanie Tucker
- 2367 **Drug resistance-associated changes in sphingolipids and ABC transporters occur in different regions of membrane domains**
John W. J. Hinrichs, Karin Klappe, Manon van Riezen, and Jan W. Kok
- 2377 **Downregulation of liver X receptor- α in mouse kidney and HK-2 proximal tubular cells by LPS and cytokines**
Yuwei Wang, Arthur H. Moser, Judy K. Shigenaga, Carl Grunfeld, and Kenneth R. Feingold
- 2388 **A human skin multifunctional O-acyltransferase that catalyzes the synthesis of acylglycerols, waxes, and retinyl esters**
Chi-Liang Eric Yen, Charles H. Brown IV, Mara Monetti, and Robert V. Farese, Jr.
- 2398 **Decreased adiponectin levels in familial combined hyperlipidemia patients contribute to the atherogenic lipid profile**
Gerly M. van der Vleuten, Lambertus J. H. van Tits, Martin den Heijer, Heidi Lemmers, Anton F. H. Stalenhoef, and Jacqueline de Graaf
- 2405 **Lipoprotein metabolism of pregnant women is associated with both their genetic polymorphisms and those of their newborn children**
Olivier S. Descamps, Monique Bruniaux, Pierre-Francois Guilmot, René Tonglet, and Francis R. Heller

COVER: Macrophage infiltration and inflammatory activation in white adipose tissue is implicated in the development of obesity complications, including insulin resistance. Dramatically elevated rates of adipocyte death in obese mice and humans and the selective localization of activated macrophages to these sites are demonstrated. At these sites, macrophages form syncytial crown-like structures and multinucleated giant cells that scavenge and sequester "free" adipocyte lipid. (See Cinti et al., p. 2347.)

- 2415 **Interaction of a partially fluorinated long-chain nicotinate with dipalmitoylphosphatidylcholine**
Hans-Joachim Lehmler and Paul M. Bummer
- 2423 **Intestinal cholesterol absorption is substantially reduced in mice deficient in both ABCA1 and ACAT2**
Ryan E. Temel, Richard G. Lee, Kathryn L. Kelley, Matthew A. Davis, Ramesh Shah, Janet K. Sawyer, Martha D. Wilson, and Lawrence L. Rudel
- 2432 **Peroxisome proliferator-activated receptor α is required for feedback regulation of highly unsaturated fatty acid synthesis**
Yue Li, Takayuki Y. Nara, and Manabu T. Nakamura
- 2441 **Structure and function of lysosomal phospholipase A₂: identification of the catalytic triad and the role of cysteine residues**
Miki Hiraoka, Akira Abe, and James A. Shayman
- 2448 **Expression and regulation of 1-acyl-*sn*-glycerol-3-phosphate acyltransferases in the epidermis**
Biao Lu, Yan J. Jiang, Mao Q. Man, Barbara Brown, Peter M. Elias, and Kenneth R. Feingold
- 2458 **Mechanisms of sphingosine and sphingosine 1-phosphate generation in human platelets**
Motohiro Tani, Takamitsu Sano, Makoto Ito, and Yasuyuki Igarashi
- 2468 **Plant sterols and stanols: effects on mixed micellar composition and LXR (target gene) activation**
Jogchum Plat, Jason A. Nichols, and Ronald P. Mensink
- 2477 **Expression, regulation, and triglyceride hydrolase activity of Adiponutrin family members**
Andrew C. Lake, Ying Sun, Jian-Liang Li, Jae Eun Kim, Jeremy W. Johnson, Dongmei Li, Tracy Revett, Heather H. Shih, Wei Liu, Janet E. Paulsen, and Ruth E. Gimeno
- 2488 **PGE₂ release is independent of upregulation of Group V phospholipase A₂ during long-term stimulation of P388D₁ cells with LPS**
Ursula A. Kessen, Ralph H. Schaloske, Daren L. Stephens, Karin Killermann Lucas, and Edward A. Dennis
- 2497 **Ceramide- and ERK-dependent pathway for the activation of CCAAT/enhancer binding protein by interleukin-1 β in hepatocytes**
Natalia V. Giltiay, Alexander A. Karakashian, Alexander P. Alimov, Sandy Ligthle, and Mariana N. Nikolova-Karakashian

Methods

- 2506 **Quantification of lipid alkyl radicals trapped with nitroxyl radical via HPLC with postcolumn thermal decomposition**
Ichiro Koshiishi, Kazunori Tsuchida, Tokuko Takajo, and Makiko Komatsu
- 2514 **Ion-trap tandem mass spectrometric analysis of Amadori-glycated phosphatidylethanolamine in human plasma with or without diabetes**
Kiyotaka Nakagawa, Jeong-Ho Oak, Ohki Higuchi, Tsuyoshi Tsuzuki, Shinichi Oikawa, Haruhisa Otani, Masatoshi Mune, Hua Cai, and Teruo Miyazawa
- 2525 **Calendar**
- 2527 **Author Index**
- 2527 **Errata**
